

CBD For Neurodegenerative Conditions

October, 2022

Studies have shown CBD may help improve neurological health by interacting within the ECS and various neurotransmitters. Population wide health improvements have increased our lifespan which, along with a larger generation of aging Americans, means more people may be affected by neurodegenerative conditions. This creates a need to improve our understanding of neurodegenerative conditions and develop new approaches for treatment and prevention. Inflammation in the brain can lead to problems such as vision loss, weakness and paralysis. Loss of brain cells, which happens if you suffer a stroke, can affect your ability to think clearly. Brain tumors can also press on nerves and affect brain function. Some brain conditions are genetic. And there is little known about what causes some brain conditions. Memory and other thinking problems have many possible causes, including depression, an infection, or medication side effect. Sometimes, the problem can be treated, and other times, the problem is a physiological disorder. Finding the cause of the problems is important to determine the best course of action.

Neurodegenerative issues are characterized by a loss of neurons in particular regions of the nervous system. It is believed that this nerve cell loss underlies the subsequent decline in cognitive and motor function that patients experience in these conditions. At present, there are few therapies for the wide range of neurodegenerative conditions, although scientists are still in search of new therapeutic approaches. Oxidative stress and free radical generation catalyzed by redox metals have been shown to play a pivotal role in regulating the contributing culprits in neurodegeneration. There is clinical evidence that suggests dietary intake which contains a variety of antioxidants and various supplements might play a vital role in neuroprotection and neurological health. Presently, there is considerable research being conducted among Cannabis compounds, cannabidiol (CBD), which lack any unwanted psychotropic effect, and may represent a very promising option for therapeutic use.

About US

Novel CBD started as a means to provide premium quality CBD and CBD-infused products with unmatched service and unparalleled commitment to our community. Our commitment to providing world-class products and improved quality of life for people and animals is a passion for everyone at dwell, and we are committed to being good stewards of our natural resources to earn and retain the confidence our customers have placed in our company and products.

Our Mission

To provide our customers with the highest quality CBD & CBD-infused products available, while serving our community with a commitment and dedication to wellness for everyone!

Dr. Brian King, PhD, M.D.

Dr. Brock Leisge, PharmD

The information shared in this whitepaper is not all-encompassing or comprehensive and does not in any way intend to create or put into implicit effect any elements of a contractual relationship. The primary purpose of this whitepaper is to provide potential token holders with pertinent information in order for them to thoroughly analyze the project and make an informed decision. Prior to your participation in the purchase of TWJ coins, we strongly advocate a careful study of this whitepaper all the documents associated with the same, including the contract in relation to the purchase of the same. You may even engage the services of appropriate experts to help you with investment analysis. Certain statements, estimates and financial information featured in this whitepaper are forward-looking statements that are based on and take into consideration certain known and unknown contingencies and risks which in eventuality may cause the estimated results or may differ factually and substantially from the featured estimates or results extrapolated or expressed in such forward-looking statements herewith.
